

Description

Analytics is a powerful and user-friendly tool that provides a comprehensive summary of Practice/PCN/Federation/ICB performance. It prominently displays six critical metrics on a single screen, offering healthcare providers the ability to quickly assess practice efficiency whilst pinpointing bottlenecks and areas for improvement.

Behind the visually stunning metrics lies the detail: a totally configurable user-interface that allows huge amounts of data to be quickly sorted, filtered and visualised to give the user that all important insight into the issue AND the patient cohorts that need engaging with to effect change.

The ability to create and save custom report templates facilitates effortless sharing among staff and organisations, driving standardisation and enabling ongoing performance improvements.

Additionally, our mapping features enables spatial analysis of patient healthcare needs, ensuring a comprehensive understanding of your practice. Great examples of this could be where to place an Outreach clinic, vaccination bus or a nurse visiting patients in their homes.

Why is it important?

Optimised Capacity: Amidst the mounting pressures and anticipated reduction in GP numbers, efficiency becomes paramount. We can pro-actively address the issue of DNAs (Did Not Attend), which see thousands of appointment hours lost annually across GP Practices.

Enhanced Patient Care: PACO analytics supports the creation of advanced elective care options, enriching patient outcomes and experience. It confronts the challenges faced in Primary Care head-on.

Comprehensive Data Consolidation: Our analytics platform amalgamates data from practices with sharing agreements in place, offering extensive support for analytical use cases spanning PCNs/Federations, locations, and ICBs. It ensures data-driven decision-making, bolstering efficiency and ensuring adherence to improvement targets and strategies, including Major Conditions.

What it does

Streamlined Data Analysis: PACO Analytics harnesses daily data extracts from clinical systems and industry-standard coding and data structures, enabling swift and user-friendly analysis of pivotal GP Practice and patient data. The data is readily searchable and filterable, empowering you with data-driven insights.

Real-Time Appointment Data: Stay ahead of patient demand with real-time appointment data, ensuring timely access to the right appointment slots with the appropriate staff members, thereby curtailing appointment waste and bolstering practice efficiency.

Benefits

Empowering Data-Driven Decision Making: Unlock actionable insights, allowing you to make data-driven decisions that optimise efficiency.

Holistic Understanding: PACO Analytics serves as your guide, signposting key bottlenecks and issues for a comprehensive grasp of your practice's dynamics.

Assurance and Compliance: Monitor performance, ensure improvement targets are met, and guarantee adherence to critical strategies, such as Major Conditions, fostering a culture of compliance and excellence.

Efficient Data Analysis: Our platform provides rapid, user-friendly analysis of crucial GP Practice and Patient information, allowing for quick searches and filtered data-driven insights.

Improved Patient Outcomes: Rapid identification of patient cohorts for communication and intervention. Population Health benefits through improved case-finding and risk stratification.
